

Services for Gear Units and Couplings

The Drive & Control Company

Competent Services and Maintenance

In Rexroth's Gear Technology Division we do not merely produce high-grade planetary gear units for a variety of application needs. Based on long years of practical experience and comprehensive know-how we also offer all-embracing services for your driving systems. Make use of this opportunity to maximize the availability of your systems or equipment items and rule out unnecessary and cost-intensive downtimes.

Our Repair Services

- Disassembly and expert cleaning of components
- Environmentally acceptable disposal of spent oil and materials that cannot be reused
- Diagnostic reports
- Acquisition of damage data and cause investigation, if applicable
- Preparation of cost estimates and time schedules
- Remedial action such as reworking or metal coating of worn surfaces
- Regrinding of gear teeth based on original drawings and machine setting data
- Using original spares based on manufacturers' know-how, e.g. special delivery instructions
- Assembly and fabrication according to archived original data
- Logged trial runs
- Finishing paint coat to client's requirements
- Extended warranty period

Our Reconstruction Services

- Investigation and discussion of the requested reconstruction measures with qualified experts
- Sizing and design work based on dedicated EDP software and CAD methods
- Offer preparation including time schedule
- Work carried out by experienced personnel
- Commissioning assistance

Our Field Services

- Field inspections carried out by qualified and experienced experts
- Performing and/or providing assistance in commissioning activities
- Checking the alignment and mounting conditions for gear units and couplings
- Field failure assessment by expert personnel
- Operating data acquisition and evaluation using up-to-date innovative equipment
- Preparation of offers showing description of services, binding invoicing rates, living allowances and travel expenses

Our Spares Provision Services

- Original spares from series production or tailored to client-specific needs
- Spare parts kits (wearing parts) to satisfy repair and maintenance requirements
- Reconstruction kits for existing systems optimized through close cooperation with design and development departments
- Exemplary customer support based on agreeable partnering relationships

Training Courses

- We offer training opportunities in connection with our gearbox supply programs tailored to your specific requirements

Service Stations

To accommodate our customers as much as possible we endeavor to minimize costs and waiting times regarding the delegation of service personnel. We have therefore set up service centers in several countries where specialists are at your disposal to carry out the above described services based on our prescribed quality standards.
